## **Product Information:**

Alternate Names: Uniprot ID: Background:	Transferrin receptor protein 1;Tfrc;TR;TfR;TfR1;Trfr;CD71; Q62351 CD71 is a 95 kD type II heterodimeric transmembrane glycoprotein that is also known as T9 and transferrin receptor. CD71 is expressed on proliferating cells, reticulocytes, and erythroid precursors. Its expression is very low on resting leukocytes. CD71 plays a role in the control of cellular proliferation by facilitating the uptake of iron via ferrotransferrin binding and the recycling of apotransferrin to the cell surface.
