

**GenieFluor 647 Anti-Mouse CD71
Antibody [R17 217.1.3/TIB-219]
Catalogue Code: AGEL1204**

Antibody Data

Product SKU:	AGEL1204	Clone:	R17 217.1.3/TIB-219
Applications:	FCM		
Reactivity:	Mouse		

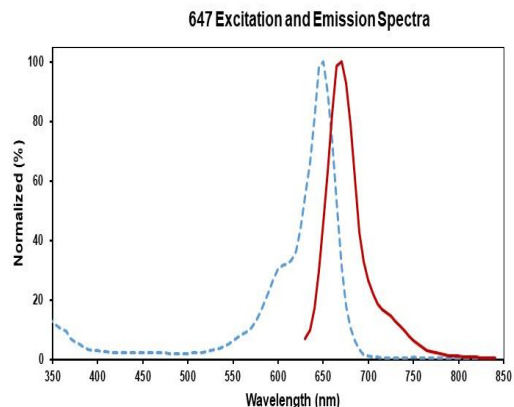

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Transferrin receptor protein 1;Tfrc;TR;TfR;TfR1;Tfrr;CD71;
Uniprot ID: Q62351
Background: CD71 is a 95 kD type II heterodimeric transmembrane glycoprotein that is also known as T9 and transferrin receptor. CD71 is expressed on proliferating cells, reticulocytes, and erythroid precursors. Its expression is very low on resting leukocytes. CD71 plays a role in the control of cellular proliferation by facilitating the uptake of iron via ferrotransferrin binding and the recycling of apotransferrin to the cell surface.

Form: Liquid
Conjugation: Genie Fluor647
Size: 25µg, 100µg
Host Species: Rat
Isotype: Rat IgG2a, κ

Isotype Control: Genie Fluor 647 Rat IgG2a, κ Isotype Control[2A3] [Product AGEL 1204]
Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping: Biological ice pack at 4°C

Stability & Storage: Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.

Recommended Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 µg/10⁶ cells in 100 µL volume].
