

Product Datasheet **PE/GenieFluor 594 Anti-Mouse CD8a Antibody [53-6.7]** Catalogue Code: AGEL3028

Antibody Data

Product SKU:	AGEL3028	Clone:	53-6.7	
Applications:	FCM			
Reactivity:	Mouse			

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Uniprot ID:	T-cell surface glycoprotein CD8 alpha chain;CD8A;T-lymphocyte differentiation antigen T8/Leu-2;MAL; P01731		
Background:	CD8, also known as Lyt-2, Ly-2, or T8, consists of disulfide-linked α and β chains that form the α (CD8a)/ β (CD8b) heterodimer and α/α homodimer. CD8a is a 34 kD protein that belongs to the immunoglobulin family. The CD8 α/β heterodimer is expressed on the surface of most thymocytes and a subset of mature TCR α/β T cells. CD8 expression on mature T cells is non-overlapping with CD4. The CD8 α/α homodimer is expressed on a subset of γ/δ TCR-bearing T cells, NK cells, intestinal intraepithelial lymphocytes, and lymphoid dendritic cells. CD8 is an antigen co-receptor on T cells that interacts with MHC class I on antigen-presenting cells or epithelial cells. CD8 promotes T cell activation through its association with the TCR complex and protein tyrosine kinase lck.		
Form:	Liquid		94 Excitation and Emission Spectra
Conjugation:	PE/Genie Fluor594	100 -	$\Lambda \Lambda$
Size:	50 Tests, 100 Tests, 200 Tests	80 - (%)	
Host Species:	Rat	Normalized (%)	
Isotype:	Rat IgG2a, κ	20 - 0 + 35	0 400 450 500 550 600 650 700 750 800 850 Wavelength (nm)
Isotype Control:	PE/Genie Fluor 594 Rat IgG2a, κ Isotype Control[2A3] [Product AGEL3028]		

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
