

Product Datasheet GenieFluor 488 Anti-Mouse CD274/PD-L1 Antibody [10F.9G2] Catalogue Code: AGEL3322

Antibody Data

Product SKU:	AGEL3322	Clone:	10F.9G2
Applications:	FCM		
Reactivity:	Mouse		

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Uniprot ID: Background:	 B7-H1; PD-L1;Programmed cell death ligand 1;B7 homolog 1;B7-H; B7H1; PDL1; PDCD1L1; PDCD1LG1; Q9EP73 CD274, also known as B7-H1 or programmed death ligand 1 (PD-L1), is a 40 kD type I transmembrane protein and a member of the B7 family within the immunoglobulin receptor superfamily. It is expressed on T cells, B cells, NK cells, dendritic cells, IFN-γ activated endothelial cells, and monocytes. B7-H1 is one of the ligands of PD-1. The interaction of B7-H1 with PD-1 plays an important role in the inhibition of T cell responses. Other studies have shown that B7-H1 is able to costimulate T cell growth and cytokine production. CD274 is involved in costimulation essential for T cell proliferation and production of IL-10 and IFN-γ, in an IL-2-dependent and a PD-1-independent manner. Its interaction with PD-1 inhibits T cell proliferation and cytokine production. 		
Form:	Liquid	488 Excitation and Emission Spectra	
Conjugation:	Genie Fluor488	100	
Size:	50 Tests, 100 Tests, 200 Tests	80 - S	
Host Species:	Rat	(%) p 60	
Isotype:	Rat IgG2b, κ	E 40 20 0 0 0 0 0 0 0 0 0 0 0 0 0	
Isotype Control:	Genie Fluor 488 Rat IgG2b, κ Isotype Control[LTF-2] [Product AGEL3322]		
Storage Buffer	Phoenbate buffered solution $pH72$ containing 0.00% stabilizer and 1% protein protectant		

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
