

CAB20137

Product Information

Product SKU:	CAB20137	Gene ID:	43740568		Size:	20uL, 100uL	
Clone No:	-	Host Species:	Rabbit		Reactivity :	SARS-CoV-2	
Additional Ir	nformation						
Observed MW:	110kDa/180)kDa	Conjugate:	-			
Calculated MW	: 141kDa		lsotype:	lgG			

Immunogen Information

Background	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is an enveloped, positive-sense, single-
	stranded RNA virus that causes coronavirus disease 2019 (COVID-19). Virus particles include the RNA
	genetic material and structural proteins needed for invasion of host cells. Once inside the cell the
	infecting RNA is used to encode structural proteins that make up virus particles, nonstructural proteins
	that direct virus assembly, transcription, replication and host control and accessory proteins whose
	function has not been determined.~ The structural proteins of SARS-CoV-2 include the envelope protein
	(E), spike or surface glycoprotein (S), membrane protein (M) and the nucleocapsid protein (N). The spike
	glycoprotein is found on the outside of the virus particle and gives coronavirus viruses their crown-like
	appearance. This glycoprotein mediates attachment of the virus particle and entry into the host cell. S
	protein is an important target for vaccine development, antibody therapies and diagnostic antigen-
	based tests.
Recommended Dilution :	DB,1:500 - 1:2000 WB,1:500 - 1:1000 IF/ICC,1:50 - 1:200 IP,0.5µg-4µg antibody for 200µg-400µg extracts
	of whole cells
Synonyms:	spike glycoprotein; SARS-CoV-2 Spike
Purifcation Method:	Affinity purification
Immunogen:	A synthetic peptide corresponding to a sequence within amino acids 600-700 of coronavirus Spike
	(YP_009724390.1).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.
