

CAB20822

Product Information

Product SKU: CAB20822	Gene ID: 8290/8350	Size: 20uL, 100uL
Clone No: -	Host Species: Rabbit	Reactivity: Human,Mouse,Rat,Other (Wide Range Predicted)

Additional Information

Observed MW: 17kDa	Conjugate: Unconjugated
Calculated MW: 16kDa	Isotype: IgG

Immunogen Information

Background:	Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Nucleosomes consist of approximately 146 bp of DNA wrapped around a histone octamer composed of pairs of each of the four core histones (H2A, H2B, H3, and H4). The chromatin fiber is further compacted through the interaction of a linker histone, H1, with the DNA between the nucleosomes to form higher order chromatin structures. This gene is intronless and encodes a replication-dependent histone that is a member of the histone H3 family. Transcripts from this gene lack polyA tails; instead, they contain a palindromic termination element. This gene is located separately from the other H3 genes that are in the histone gene cluster on chromosome 6p22-p21.3.
Recommended Dilution:	WB,1:100 - 1:500 ChIP,5µg antibody for 5µg-10µg of Chromatin
Synonyms:	H3t; H3.4; H3/g; H3FT; H3C16; HIST3H3; DiMethyl-Histone H3-K79
Purification Method:	Affinity purification
Immunogen:	A synthetic dimethylated peptide around K79 of human histone H3 (NP_003520.1).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.
