

CAB22330

Product Information

Product SKU:	CAB22330	Gene ID:	2247	Size:	20uL, 100uL
Clone No:	ARC51110	Host Species:	Rabbit	Reactivity:	Human,Mouse,Rat

Additional Information

Observed MW:	18kDa/22kDa/26kDa	Conjugate:	Unconjugated
Calculated MW:	17kDa/21kDa/22kDa/30kDa	Isotype:	IgG

Immunogen Information

Background:	The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members bind heparin and possess broad mitogenic and angiogenic activities. This protein has been implicated in diverse biological processes, such as limb and nervous system development, wound healing, and tumor growth. The mRNA for this gene contains multiple polyadenylation sites, and is alternatively translated from non-AUG (CUG) and AUG initiation codons, resulting in five different isoforms with distinct properties. The CUG-initiated isoforms are localized in the nucleus and are responsible for the intracrine effect, whereas, the AUG-initiated form is mostly cytosolic and is responsible for the paracrine and autocrine effects of this FGF.
Recommended Dilution:	WB,1:500 - 1:1000
Synonyms:	BFGF; FGFB; FGF-2; HBGF-2; FGF2
Purification Method:	Affinity purification
Immunogen:	A synthetic peptide corresponding to a sequence within amino acids 100-200 of human FGF2 (NP_001997.5).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,0.05% BSA,50% glycerol,pH7.3.
