

CAB24352

Product Information

Product SKU:	CAB24352	Gene ID:	2033	Size:	20uL, 100uL
Clone No:	-	Host Species:	Rabbit	Reactivity:	Mouse,Rat

Additional Information

Observed MW:	Refer to figures	Conjugate:	Unconjugated
Calculated MW:	264kDa	Isotype:	IgG

Immunogen Information

Background: This gene encodes the adenovirus E1A-associated cellular p300 transcriptional co-activator protein. It functions as histone acetyltransferase that regulates transcription via chromatin remodeling and is important in the processes of cell proliferation and differentiation. It mediates cAMP-gene regulation by binding specifically to phosphorylated CREB protein. This gene has also been identified as a co-activator of HIF1A (hypoxia-inducible factor 1 alpha), and thus plays a role in the stimulation of hypoxia-induced genes such as VEGF. Defects in this gene are a cause of Rubinstein-Taybi syndrome and may also play a role in epithelial cancer.

Recommended Dilution: IHC-P,1:50 - 1:200

Synonyms: p300; KAT3B; MKHK2; RSTS2; EP300

Purification Method: Affinity purification

Immunogen: Recombinant Protein corresponding to a sequence within amino acids 940-1030 of human EP300(NP_001420.2).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.
