NOTCH2 Polyclonal Antibody

Product Information

Product SKU: CAB24877 **Gene ID**: 4853 **Size**: 20uL, 100uL

Clone No: - Host Species: Rabbit Reactivity: Human, Mouse, Rat

Additional Information

Observed MW: 110kDa **Conjugate:** Unconjugated

Calculated MW: 265kDa Isotype: IgG

Immunogen Information

Background: This gene encodes a member of the Notch family. Members of this Type 1 transmembrane protein family

share structural characteristics including an extracellular domain consisting of multiple epidermal growth factor-like (EGF) repeats, and an intracellular domain consisting of multiple, different domain types. Notch family members play a role in a variety of developmental processes by controlling cell fate decisions. The Notch signaling network is an evolutionarily conserved intercellular signaling pathway which regulates interactions between physically adjacent cells. In Drosophilia, notch interaction with its cell-bound ligands (delta, serrate) establishes an intercellular signaling pathway that plays a key role in development. Homologues of the notch-ligands have also been identified in human, but precise interactions between these ligands and the human notch homologues remain to be determined. This protein is cleaved in the trans-Golgi network, and presented on the cell surface as a heterodimer. This protein functions as a receptor for membrane bound ligands, and may play a role in vascular, renal and hepatic development. Two transcript variants encoding different isoforms have been found for this gene.

Recommended Dilution: WB,1:500 - 1:1000 IF/ICC,1:50 - 1:200

Synonyms: NOTCH2; AGS2; HJCYS; hN2; notch 2

Purifcation Method: Affinity purification

Immunogen: Recombinant Protein corresponding to a sequence within amino acids 1697-1819 of human

NOTCH2(NP_077719.2).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.
