CAB3654

Product Information

Product SKU:	CAB3654	Gene ID:	186		Size:	20uL, 100uL	
Clone No:	ARC2064	Host Species:	Rabbit		Reactivity :	Human, Mouse, Rat	
Additional Information							
Observed MW:	45kDa		Conjugate:	Unconjugatec	ł		
Calculated MW	41kDa		lsotype:	lgG			

Immunogen Information

Background:	The protein encoded by this gene belongs to the G-protein coupled receptor 1 family, and functions as
	a receptor for angiotensin II. It is an intergral membrane protein that is highly expressed in fetus and in
	neonates, but scantily in adult tissues, except brain, adrenal medulla, and atretic ovary. This receptor has
	been shown to mediate programmed cell death and this apoptotic function may play an important role
	in developmental biology and pathophysiology. Mutations in this gene are been associated with X-
	linked cognitive disability. Severe Acute Respiratory Syndrome Coronavirus (SARS-CoV) and SARS-CoV-
	2 infection results in down-regulation of angiotensin converting enzyme-2 (ACE2) receptors, the effects
	of which, triggers serious inflammatory lesions in the tissues involved, primarily in the lungs. The
	inflammatory reaction appears to be mediated by angiotensin II derivatives, including the angiotensin
	AT2 receptor which has been found to be upregulated in bronchoalveolar lavage samples from
	Coronavirus disease 2019 (COVID19) patients.
Recommended Dilution:	WB,1:500 - 1:2000
Synonyms:	AT2; ATGR2; MRX88; AGTR2
Purifcation Method:	Affinity purification
Immunogen:	A synthetic peptide corresponding to a sequence within amino acids 264-363 of human AGTR2 (P50052).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,0.05% BSA,50%
	glycerol,pH7.3.
