Sprouty 2 Rabbit Monoclonal Antibody

Product Information

Product SKU: CAB8611 **Gene ID**: 10253 **Size**: 20uL, 100uL

Clone No: ARC1753 Host Species: Rabbit Reactivity: Human,Rat

Additional Information

Observed MW: 35kDa Conjugate: Unconjugated

Calculated MW: 35kDa Isotype: IgG

Immunogen Information

Background: This gene encodes a protein belonging to the sprouty family. The encoded protein contains a carboxyl-

terminal cysteine-rich domain essential for the inhibitory activity on receptor tyrosine kinase signaling proteins and is required for growth factor stimulated translocation of the protein to membrane ruffles. In primary dermal endothelial cells this gene is transiently upregulated in response to fibroblast growth factor two. This protein is indirectly involved in the non-cell autonomous inhibitory effect on fibroblast growth factor two signaling. The protein interacts with Cas-Br-M (murine) ectropic retroviral

transforming sequence, and can function as a bimodal regulator of epidermal growth factor receptor/mitogen-activated protein kinase signaling. This protein may play a role in alveoli branching

during lung development as shown by a similar mouse protein.

Recommended Dilution: WB,1:500 - 1:1000 IHC-P,1:50 - 1:200

Synonyms: IGAN3; hSPRY2; Sprouty 2

Purifcation Method: Affinity purification

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 216-315 of human Sprouty 2

(O43597).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,0.05% BSA,50%

glycerol,pH7.3.
