

MED23 Rabbit Polyclonal Antibody

CAB9856

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

156kDa

Calculated MW:

54kDa/100kDa/155kDa/156kDa

Applications:

WB

Reactivity:

Human

Antibody Information

Recommended dilutions:

WB 1:500 - 1:2000

Source:

Rabbit

Isotype:

IgG

Purification:

Affinity purification

Protein Background

The activation of gene transcription is a multistep process that is triggered by factors that recognize transcriptional enhancer sites in DNA. These factors work with co-activators to direct transcriptional initiation by the RNA polymerase II apparatus. The protein encoded by this gene is a subunit of the CRSP (cofactor required for SP1 activation) complex, which, along with TFIID, is required for efficient activation by SP1. This protein is also a component of other multisubunit complexes e.g. thyroid hormone receptor-(TR-) associated proteins which interact with TR and facilitate TR function on DNA templates in conjunction with initiation factors and cofactors. This protein also acts as a metastasis suppressor. Several alternatively spliced transcript variants encoding different isoforms have been described for this gene.

Immunogen information

Gene ID:

70208

Uniprot

Synonyms:

MED23; ARC130; CRSP130; CRSP133; CRSP3; DRIP130; MRT18; SUR-2; SUR2

Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 666-965 of mouse MED23 (NP_001159888.1).

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
