

RSV Paired Antibody

CPAB0402

Product Information

Size:

100µg

Applications:

Reactivity:

Viral

Source:

Isotype:

Purification Method:

Purified monoclonal IgG2a by protein A chromatography.

Protein Background:

RSV gold conjugation antibody and RSV capture antibody are used to develop rapid test for RSV rapid test. Please note that when ordering for example: 100µg antibody we ship 50µg from each of the antibodies (100µg in total).

Synonyms:

Immunogen:
