

IVMB0494

Product Information

Product SKU: IVMB0494	Clone: Hu107	Target: CD25
Size: 50 µg		Isotype: Human IgG1k

Additional Information

Reactivity: Human/Rhesus Monkey/Cynomolgus Monkey	Host Species: Human
Antibody Type: Biosimilar Recombinant Human Monoclonal Antibody	Expression Host: HEK-293 Cells

Immunogen Information

Background: CD25, a 55 kD type I transmembrane glycoprotein, has been shown to play roles in lymphocyte differentiation, activation, and proliferation. Many resting memory T cells constitutively express IL2R α . It functions as the receptor for HTLV-1, resulting in its expression on neoplastic cells in adult T cell lymphoma/leukemia. CD25 (sIL-2R) has been used to track disease progression. Some additional clinical applications include Chagas disease, a disease characterized by a decline of CD25 expression on immune cells, and Multiple sclerosis, in which treatments with mAbs target CD25. Anti-Human IL-2R alpha (CD25) (Basiliximab) utilizes the same variable regions from the therapeutic antibody Basiliximab making it ideal for research projects.

Product Concentration: 0.2 mg/ml

Applications: FC

Synonyms: IL-2-RA; IL2-RA; TAC antigen; p55; CD25

Antigen Distribution: IL-2R α is expressed on activated mature T and B lymphocytes, during early stages of thymocytes development, pre-B cells, and in activated CD4+ memory T-lymphocytes.

Immunogen: Human CD25

Formulation: This Allophycocyanin (APC) conjugate is formulated in 0.01 M phosphate buffered saline (150 mM NaCl) PBS pH 7.4, 1% BSA and 0.09% sodium azide as a preservative.

- Specificity:** This non-therapeutic biosimilar antibody uses the same variable region sequence as the therapeutic antibody Basiliximab. Basiliximab recognizes human CD25. This product is for research use only.
- Pathogen Testing:** -
- Storage & Handling:** This Allophycocyanin (APC) conjugate is stable when stored at 2-8°C. Do not freeze.
