IL17RC Antibody

PACO13976

Product Information	
Size:	Protein Background:
50ul	This gene encodes a single-pass type I membrane protein that shares similarity with the
Reactivity:	interleukin-17 receptor (IL-17RA). Unlike IL-17RA, which is predominantly expressed in hemopoietic cells, and binds with high affinity to only IL-17A, this protein is expressed
Human	in nonhemopoietic tissues, and binds both IL-17A and IL-17F with similar affinities. The proinflammatory cytokines, IL-17A and IL-17F, have been implicated in the progression
Source:	of inflammatory and autoimmune diseases. Multiple alternatively spliced transcript
Rabbit	variants encoding different isoforms have been detected for this gene, and it has been proposed that soluble, secreted proteins lacking transmembrane and intracellular
lsotype:	domains may function as extracellular antagonists to cytokine signaling.
lgG	Gene ID:
Applications:	IL17RC
ELISA, IHC	Uniprot
Recommended dilutions:	Q8NAC3
ELISA:1:1000-1:10000, IHC:1:25-1:100	Synonyms:
	Interleukin-17 receptor C
	Immunogen:
	Fusion protein of human IL17RC.
	Storage:
	-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image is immunohistochemistry of paraffin-embedded Human tonsil tissue using PACO13976(IL17RC Antibody) at dilution 1/20. (Original magnification: x—200).

The image is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using PACO13976(IL17RC Antibody) at dilution 1/20. (Original magnification: x—200).
