

Product Information

Size:

50ul

Reactivity:

Human

Source:

Rabbit

Isotype:

IgG

Applications:

ELISA, IHC

Recommended dilutions:

ELISA:1:1000-1:2000, IHC:1:25-1:100

Protein Background:

The protein encoded by this gene is a bifunctional enzyme that catalyzes the oxidative conversion of delta(5)-ene-3-beta-hydroxy steroid, and the oxidative conversion of ketosteroids. It plays a crucial role in the biosynthesis of all classes of hormonal steroids. This gene is predominantly expressed in the adrenals and the gonads. Mutations in this gene are associated with 3-beta-hydroxysteroid dehydrogenase, type II, deficiency. Alternatively spliced transcript variants have been found for this gene.

Gene ID:

HSD3B2

Uniprot

P26439

Synonyms:

hydroxy-delta-5-steroid dehydrogenase, 3 beta- and steroid delta-isomerase 2

Immunogen:

Fusion protein of human HSD3B2.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN₃, 40% Glycerol
