MIP Antibody

PACO17743

Product Information

Size:

50ul

Reactivity:

Human, Mouse, Rat

Source:

Rabbit

Isotype:

IgG

Applications:

ELISA, IHC

Recommended dilutions:

ELISA:1:500-1:5000, IHC:1:50-1:200

Protein Background:

Major intrinsic protein is a member of the water-transporting aquaporins as well as the original member of the MIP family of channel proteins. The function of the fiber cell membrane protein encoded by this gene is undetermined, yet this protein is speculated to play a role in intracellular communication. The MIP protein is expressed in the ocular lens and is required for correct lens function. This gene has been mapped among aquaporins AQP2, AQP5, and AQP6, in a potential gene cluster at 12q13.

Gene ID:

MIP

Uniprot

P30301

Synonyms:

major intrinsic protein of lens fiber

Immunogen:

Synthetic peptide of human MIP.

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol
