IGLV1-51 Antibody

PACO18710

Product Information

Size:

50ul

Reactivity:

Human

Source:

Rabbit

Isotype:

lgG

Applications:

ELISA, WB, IHC

Recommended dilutions:

ELISA:1:2000-1:5000, WB:1:500-1:2000, IHC:1:25-1:100

Protein Background:

Transmembrane serine/threonine kinase activin type-1 receptor forming an activin receptor complex with activin receptor type-2 (ACVR2A or ACVR2B). Transduces the activin signal from the cell surface to the cytoplasm and is thus regulating a many physiological and pathological processes including neuronal differentiation and neuronal survival, hair follicle development and cycling, FSH production by the pituitary gland, wound healing, extracellular matrix production, immunosuppression and carcinogenesis. Activin is also thought to have a paracrine or autocrine role in follicular development in the ovary. Within the receptor complex, type-2 receptors (ACVR2A and/or ACVR2B) act as a primary activin receptors whereas the type-1 receptors like ACVR1B act as downstream transducers of activin signals. Activin binds to type-2 receptor at the plasma membrane and activates its serine-threonine kinase. The activated receptor type-2 then phosphorylates and activates the type-1 receptor such

as ACVR1B.

Gene ID:

IGLV1-51

Uniprot

P01701

Synonyms:

Ig lambda chain V-I region NEW

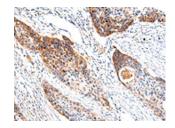

Immunogen:

Synthetic peptide of human Lambda Light chain.

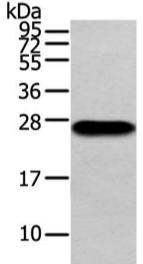

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

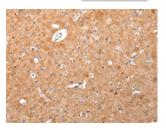

Product Images

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using PACO18710(Lambda Light chain Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).

Gel: 12%SDS-PAGE, Lysate: 40 μ g, Lane: Human plasma solution, Primary antibody: PACO18710(Lambda Light chain Antibody) at dilution 1/200 dilution, Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution, Exposure time: 10 seconds.

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using PACO18710(Lambda Light chain Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).
