SCT Antibody

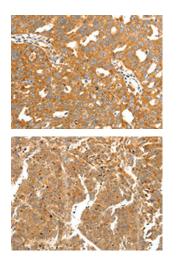

PACO18883

Product Information

Size:	Protein Background:
50ul	Component of the post-replicative DNA mismatch repair system (MMR).
Reactivity:	Heterodimerizes with MSH2 to form MutS alpha, which binds to DNA mismatches thereby initiating DNA repair. When bound, MutS alpha bends the DNA helix and
Human, Mouse, Rat	shields approximately 20 base pairs, and recognizes single base mismatches and dinucleotide insertion-deletion loops (IDL) in the DNA. After mismatch binding, forms a
Source:	ternary complex with the MutL alpha heterodimer, which is thought to be responsible
Rabbit	for directing the downstream MMR events, including strand discrimination, excision, and resynthesis. ATP binding and hydrolysis play a pivotal role in mismatch repair
lsotype:	functions. The ATPase activity associated with MutS alpha regulates binding similar to a molecular switch: mismatched DNA provokes ADP>ATP exchange, resulting in a
lgG	discernible conformational transition that converts MutS alpha into a sliding clamp
Applications:	capable of hydrolysis-independent diffusion along the DNA backbone. This transition is crucial for mismatch repair.
ELISA, IHC	Gene ID:
Recommended dilutions:	SCT
ELISA:1:2000-1:5000, IHC:1:50-1:200	Uniprot
	P09683
	Synonyms:
	secretin
	Immunogen:
	Synthetic peptide of human SCT.
	Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human ovarian cancer tissue using PACO18883(SCT Antibody) at dilution 1/60, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using PACO18883(SCT Antibody) at dilution 1/60, on the right is treated with synthetic peptide. (Original magnification: x—200).
