STEAP4 Antibody

PACO18937

Product Information	
Size:	Protein Background:
50ul	Nuclear receptor that binds DNA as a monomer to ROR response elements (RORE)
Reactivity:	containing a single core motif half-site 5'-AGGTCA-3' preceded by a short A-T-rich sequence. Key regulator of cellular differentiation, immunity, peripheral circadian
Human, Mouse	rhythm as well as lipid, steroid, xenobiotics and glucose metabolism. Considered to have intrinsic transcriptional activity, have some natural ligands like oxysterols that act as agonists (25-hydroxycholesterol) or inverse agonists (7-oxygenated sterols),
Source:	
Rabbit	enhancing or repressing the transcriptional activity, respectively. Recruits distinct combinations of cofactors to target gene regulatory regions to modulate their
lsotype:	transcriptional expression, depending on the tissue, time and promoter contexts. Regulates the circadian expression of clock genes such as CRY1, ARNTL/BMAL1 and
lgG	NR1D1 in peripheral tissues and in a tissue-selective manner.
Applications:	Gene ID:
ELISA, IHC	STEAP4
Recommended dilutions:	Uniprot
ELISA:1:2000-1:5000, IHC:1:25-1:100	Q687X5
	Synonyms:
	STEAP family member 4
	Immunogen:
	Synthetic peptide of human STEAP4.
	Storage:
	-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using PACO18937(STEAP4 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human cervical cancer tissue using PACO18937(STEAP4 Antibody) at dilution 1/40, on the right is treated with synthetic peptide. (Original magnification: x—200).
