COX5A Antibody

PACO19293

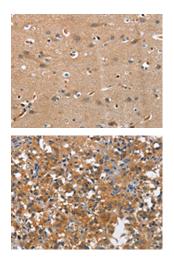

Product Information

Size:	Protein Background:
50ul	Filament-forming cytoskeletal GTPase. Required for normal organization of the actin
Reactivity:	cytoskeleton. Plays a role in the biogenesis of polarized columnar-shaped epithelium by maintaining polyglutamylated microtubules, thus facilitating efficient vesicle transport, and by impeding MAP4 binding to tubulin. Required for the progression through mitosis. Forms a scaffold at the midplane of the mitotic splindle required to maintain CENPE localization at kinetochores and consequently chromosome congression. During anaphase, may be required for chromosome segregation and spindle elongation. Plays a role in ciliogenesis and collective cell movements. In cilia, required for the integrity of the diffusion barrier at the base of the primary cilium that prevents diffusion of transmembrane proteins between the cilia and plasma membranes: probably acts by
Human, Mouse, Rat	
Source:	
Rabbit	
lsotype:	
lgG	regulating the assembly of the tectonic-like complex (also named B9 complex) by
Applications:	localizing TMEM231 protein.
Elisa, ihc	Gene ID:
De service de de dillections	COX5A Uniprot
Recommended dilutions:	
ELISA:1:1000-1:2000, IHC:1:25-1:100	P20674
	Synonyms:
	cytochrome c oxidase subunit Va
	Immunogen:
	Synthetic peptide of human COX5A.
	Storage:

Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using PACO19293(COX5A Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO19293(COX5A Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: x—200).
