BAI2 Antibody

PACO19339

Product Information	
Size:	Protein Background:
50ul	A scaffold protein that connects plasma membrane proteins and regulatory
Reactivity:	 components, regulating their surface expression in epithelial cells apical domains. May be involved in the coordination of a diverse range of regulatory processes for ion transport and second messenger cascades. In complex with SLC9A3R1, may cluster proteins that are functionally dependent in a mutual fashion and modulate the trafficking and the activity of the associated membrane proteins. May play a role in the cellular mechanisms associated with multidrug resistance through its interaction with ABCC2 and PDZK1IP1. May potentiate the CFTR chloride channel activity. Required for normal cell-surface expression of SCARB1. Plays a role in maintaining normal plasma cholesterol levels via its effects on SCARB1. Plays a role in the normal localization and function of the chloride-anion exchanger SLC26A6 to the plasma membrane in the brush border of the proximal tubule of the kidney. Gene ID: ADGRB2 Uniprot
Human, Mouse	
Source:	
Rabbit	
lsotype:	
lgG	
Applications:	
ELISA, IHC	
Recommended dilutions:	
ELISA:1:1000-1:2000, IHC:1:25-1:100	O60241
	Synonyms:
	adhesion G protein-coupled receptor B2
	Immunogen:
	Synthetic peptide of human ADGRB2.
	Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human brain tissue using PACO19339(ADGRB2 Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human liver cancer tissue using PACO19339(ADGRB2 Antibody) at dilution 1/25, on the right is treated with synthetic peptide. (Original magnification: x—200).
