CAPZA1 Antibody

PACO19387

Product Information	
Size:	Protein Background:
50ul	E3 ubiquitin-protein ligase that promotes the degradation of insoluble ubiquitinated proteins, including insoluble PAX6, poly-Gln repeat expanded HTT and poly-Ala repeat expanded ARX. Mediates PAX6 ubiquitination leading to proteasomal degradation, thereby modulating cortical neurogenesis. May also inhibit PAX6 transcriptional activity, possibly in part by preventing the binding of PAX6 to its consensus sequences. May contribute to the regulation of the intracellular level of HN (humanin) or HN-containing proteins through the proteasomal degradation. May contribute to the innate restriction of retroviruses. Upon overexpression, reduces HIV-1 and murine leukemia virus infectivity, by suppressing viral gene expression. Antiviral activity depends on a functional E3 ubiquitin-protein ligase domain.
Reactivity:	
Human, Mouse, Rat	
Source:	
Rabbit	
lsotype:	
lgG	
Applications:	Gene ID:
ELISA, IHC	CAPZA1
Recommended dilutions:	Uniprot
ELISA:1:1000-1:2000, IHC:1:25-1:100	P52907
	Synonyms:
	capping protein (actin filament) muscle Z-line, alpha 1
	Immunogen:
	Synthetic peptide of human CAPZA1.
	Storage:
	-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human gastric cancer tissue using PACO19387(CAPZA1 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).

The image on the left is immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using PACO19387(CAPZA1 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).
