ROBO2 Antibody

PACO20362

Product Information	
Size:	Protein Background:
50ul	Plays a central role during spermatogenesis by repressing transposable elements and preventing their mobilization, which is essential for the germline integrity. Acts via the piRNA metabolic process, which mediates the repression of transposable elements during meiosis by forming complexes composed of piRNAs and Piwi proteins and governs the methylation and subsequent repression of transposons. Directly binds piRNAs, a class of 24 to 30 nucleotide RNAs that are generated by a Dicer-independent mechanism and are primarily derived from transposons and other repeated sequence elements. Associates with secondary piRNAs antisense and PIWIL2/MILI is required for such association. The piRNA process acts upstream of known mediators of DNA methylation. Participates in a piRNA amplification loop. Besides their function in transposable elements repression, piRNAs are probably involved in other processes during meiosis such as translation regulation. Gene ID:
Reactivity:	
Human	
Source:	
Rabbit	
lsotype:	
lgG	
Applications:	
ELISA, IHC	
Recommended dilutions:	
ELISA:1:1000-1:2000, IHC:1:25-1:100	Uniprot
	Q9HCK4
	Synonyms:
	roundabout, axon guidance receptor, homolog 2 (Drosophila)
	Immunogen:
	Synthetic peptide of human ROBO2.
	Storage:
	-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human breast cancer tissue using PACO20362(ROBO2 Antibody) at dilution 1/35, on the right is treated with synthetic peptide. (Original magnification: x—200).
