DEFB112 Antibody

PACO20399

Product Information	
Size:	Protein Background:
50ul	Involved in chromatin remodeling. Belongs to the neural progenitors-specific chromatin remodeling complex (npBAF complex) and the neuron-specific chromatin remodeling complex (nBAF complex). During neural development a switch from a stem/progenitor to a post-mitotic chromatin remodeling mechanism occurs as neurons exit the cell cycle and become committed to their adult state. The transition from proliferating neural stem/progenitor cells to post-mitotic neurons requires a switch in subunit composition of the npBAF and nBAF complexes. As neural progenitors exit mitosis and differentiate into neurons, npBAF complexes which contain ACTL6A/BAF53A and PHF10/BAF45A, are exchanged for homologous alternative ACTL6B/BAF53B and DPF1/BAF45B or DPF3/BAF45C subunits in neuron-specific complexes (nBAF). The npBAF complex is essential for the self-renewal/proliferative capacity of the multipotent neural stem cells. The nBAF complex along with CREST plays a role regulating the activity of genes essential for dendrite growth.
Reactivity:	
Human	
Source:	
Rabbit	
lsotype:	
lgG	
Applications:	
ELISA, WB	Gene ID:
Recommended dilutions:	DEFB112
ELISA:1:2000-1:5000, WB:1:500-1:2000	Uniprot
	Q30KQ8
	Synonyms:
	defensin, beta 112
	Immunogen:
	Synthetic peptide of human DEFB112.
	Storage:
	2001 dam C m I IZ A DBC 0.050/ NI-NI2 400/ Character

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

Gel: 8%SDS-PAGE, Lysate: 40 μ gPrimary antibody: PACO20399(DEFB112 Antibody) at dilution 1/200 dilution, Secondary antibody: Goat anti rabbit IgG at 1/8000 dilution, Exposure time: 20 seconds.
