## SLC24A3 Antibody

## PACO20483

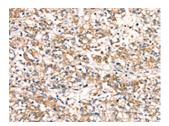

AssayGenie
------------

Size:	Protein Background:
50ul	Energy-dependent phospholipid efflux translocator that acts as a positive regulator of
Reactivity:	biliary lipid secretion. Functions as a floppase that translocates specifically phosphatidylcholine (PC) from the inner to the outer leaflet of the canalicular
Human, Mouse, Rat	membrane bilayer into the canaliculi of hepatocytes. Translocation of PC makes the biliary phospholipids available for extraction into the canaliculi lumen by bile salt mixed
Source:	micelles and therefore protects the biliary tree from the detergent activity of bile salts. Plays a role in the recruitment of phosphatidylcholine (PC), phosphatidylethanolamine (PE) and sphingomyelin (SM) molecules to nonraft membranes and to further enrichment of SM and cholesterol in raft membranes in hepatocytes. Required for proper phospholipid bile formation. Indirectly involved in cholesterol efflux activity from
Rabbit	
lsotype:	
lgG	hepatocytes into the canalicular lumen in the presence of bile salts in an ATP-
Applications:	dependent manner.
Elisa, ihc	Gene ID:
Recommended dilutions:	SLC24A3
	Uniprot
ELISA:1:1000-1:2000, IHC:1:25-1:100	Q9HC58
	Synonyms:
	solute carrier family 24 (sodium/potassium/calcium exchanger), member 3
	Immunogen:
	Synthetic peptide of human SLC24A3.

## Storage:

-20° C, pH7.4 PBS, 0.05% NaN3, 40% Glycerol

The image on the left is immunohistochemistry of paraffin-embedded Human prostate cancer tissue using PACO20483(SLC24A3 Antibody) at dilution 1/20, on the right is treated with synthetic peptide. (Original magnification: x—200).
