Product Information

Size: Protein Background:

50ug Also known as ATP:3-phosphoglycerate 1-phosphotransferase, this major enzyme in

glycolysis catalyzes the reversible conversion of 1,3-diphosphoglycerate to 3-**Reactivity:**phosphoglycerate generating one molecule of ATP, in addition to its role as a

phosphoglycerate, generating one molecule of ATP. In addition to its role as a glycolytic enzyme, PGK-1 appears to acts as a polymerase alpha cofactor protein. Defects in PGK1

are generally associated with chronic hemolytic anemia.
