## ATF3 Antibody, FITC conjugated

## PACO25106

Reactivity:

Human

**ELISA** 

## **Product Information**

Size: Protein Background:

50ug This protein binds the cAMP response element (CRE) (consensus: 5'-GTGACGT[AC][AG]-

3'), a sequence present in many viral and cellular promoters. Represses transcription from promoters with ATF sites. It may repress transcription by stabilizing the binding of

inhibitory cofactors at the promoter. Isoform 2 activates transcription presumably by

sequestering inhibitory cofactors away from the promoters.
