Ovotransferrin Antibody

PACO25368

Product Information	
Size:	Protein Background:
50ug	Transferrins are iron binding transport proteins which can bind two Fe3+ ions in
Reactivity:	association with the binding of an anion, usually bicarbonate. It is responsible for the transport of iron from sites of absorption and heme degradation to those of storage and utilization. Serum transferrin may also have a further role in stimulating cell proliferation. Gene ID:
Chicken	
Source:	
Rabbit	
lsotype:	Uniprot
lgG	P02789
Applications:	Synonyms:
ELISA	Ovotransferrin (Allergen Gal d III) (Conalbumin) (Serum transferrin) (allergen Gal d 3)
Recommended dilutions:	Immunogen:
	Chicken Ovotransferrin (Native Protein).
	Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
