Product Information

Size: Protein Background:

50ug Involved in oxygen transport from the lung to the various peripheral tissues. LVV-

hemorphin-7 potentiates the activity of bradykinin, causing a decrease in blood pressure. Spinorphin: functions as an endogenous inhibitor of enkephalin-degrading

enzymes such as DPP3, and as a selective antagonist of the P2RX3 receptor which is

involved in pain signaling, these properties implicate it as a regulator of pain and

inflammation.
