Product Information	
Size:	Protein Background:
50ug	Ubiquitin-protein hydrolase involved both in the processing of ubiquitin precursors and
Reactivity:	of ubiquitinated proteins. This enzyme is a thiol protease that recognizes and hydrolyzes a peptide bond at the C-terminal glycine of ubiquitin. Also binds to free
Human	monoubiquitin and may prevent its degradation in lysosomes. The homodimer may have ATP-independent ubiquitin ligase activity.
