THOC3 Antibody

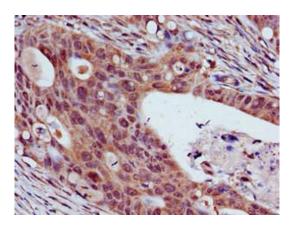

PACO38162

Product Information	
Size:	Protein Background:
50ug	Required for efficient export of polyadenylated RNA and spliced mRNA. Acts as
Reactivity:	component of the THO subcomplex of the TREX complex which is thought to couple mRNA transcription, processing and nuclear export, and which specifically associates
Human	with spliced mRNA and not with unspliced pre-mRNA. TREX is recruited to spliced mRNAs by a transcription-independent mechanism, binds to mRNA upstream of the
Source:	exon-junction complex (EJC) and is recruited in a splicing- and cap-dependent manner
Rabbit	to a region near the 5' end of the mRNA where it functions in mRNA export to the cytoplasm via the TAP/NFX1 pathway. The TREX complex is essential for the export of
lsotype:	Kaposi's sarcoma-associated herpesvirus (KSHV) intronless mRNAs and infectious virus
lgG	production.
Applications:	Gene ID: THOC3
ELISA, IHC	
Recommended dilutions:	Uniprot
ELISA:1:2000-1:10000, IHC:1:20-1:200	Q96J01
	Synonyms:
	THO complex subunit 3 (Tho3) (TEX1 homolog) (hTREX45), THOC3
	Immunogen:
	Recombinant Human THO complex subunit 3 protein (2-351AA).

Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, PH 7.4

Immunohistochemistry of paraffin-embedded human colon cancer using PACO38162 at dilution of 1:100.
