TIFA Antibody

PACO38706

Product Information	
Size:	Protein Background:
50ug	Adapter protein which mediates the IRAK1 and TRAF6 interaction following IL-1
Reactivity:	stimulation, resulting in the downstream activation of NF-kappa-B and AP-1 pathways. Induces the oligomerization and polyubiquitination of TRAF6, which leads to the
Human	activation of TAK1 and IKK through a proteasome-independent mechanism.
Source:	Gene ID:
Rabbit	TIFA
lsotype:	Uniprot
lgG	Q96CG3
Applications:	Synonyms:
ELISA	TRAF-interacting protein with FHA domain-containing protein A (Putative MAPK- activating protein PM14) (Putative NF-kappa-B-activating protein 20) (TRAF2-binding
Recommended dilutions:	protein), TIFA, T2BP
	Immunogen:
	Recombinant Human TRAF-interacting protein with FHA domain-containing protein A protein (1-184AA).
	Storage:
	Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
