CALHM1 Antibody

Product Information

PACO43486

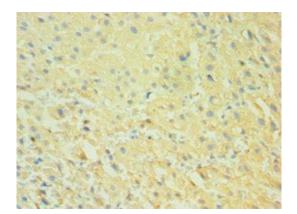

Size: **Protein Background:** 50ul Pore-forming subunit of a voltage-gated ion channel required for sensory perception of sweet, bitter and umami tastes. Specifically present in type II taste bud cells, where it Reactivity: plays a central role in sweet, bitter and umami taste perception by inducing ATP release from the cell, ATP acting as a neurotransmitter to activate afferent neural gustatory Human pathways. Acts both as a voltage-gated and calcium-activated ion channel: mediates Source: neuronal excitability in response to changes in extracellular Ca2+ concentration. Has poor ion selectivity and forms a wide pore (around 14 Angstroms) that mediates Rabbit permeation of Ca2+, Na+ and K+, as well as permeation of monovalent anions. Acts as an activator of the ERK1 and ERK2 cascade. Triggers endoplasmic reticulum stress by Isotype: reducing the calcium content of the endoplasmic reticulum. May indirectly control lgG amyloid precursor protein (APP) proteolysis and aggregated amyloid-beta (Abeta) peptides levels in a Ca2+ dependent manner. **Applications:** Gene ID: ELISA, IHC CALHM1 **Recommended dilutions:** Uniprot ELISA:1:2000-1:10000, IHC:1:20-1:200 Q8IU99 Synonyms: Calcium homeostasis modulator protein 1 (Protein FAM26C), CALHM1, FAM26C

Immunogen:

Storage:

Recombinant Human Calcium homeostasis modulator protein 1 protein (202-346AA).
