

Product Information

Size:

50ul

Protein Background:

Mitochondrial intermembrane chaperone that participates in the import and insertion of some multi-pass transmembrane proteins into the mitochondrial inner membrane. Also required for the transfer of beta-barrel precursors from the TOM complex to the

Reactivity:

Human

sorting and assembly machinery (SAM complex) of the outer membrane. Acts as a chaperone-like protein that protects the hydrophobic precursors from aggregation and guide them through the mitochondrial intermembrane space. The TIMM8-TIMM13 complex mediates the import of proteins such as TIMM23, SLC25A12/ARALAR1 and SLC25A13/ARALAR2, while the predominant TIMM9-TIMM10 70 kDa complex mediates the import of much more proteins. Probably necessary for normal neurologic development.

Source:

Rabbit

Isotype:

IgG

Gene ID:

TIMM8A

Applications:

ELISA, IHC

Uniprot

O60220

Recommended dilutions:

ELISA:1:2000-1:10000, IHC:1:20-1:200

Synonyms:

Mitochondrial import inner membrane translocase subunit Tim8 A (Deafness dystonia protein 1) (X-linked deafness dystonia protein), TIMM8A, DDP DDP1 TIM8A

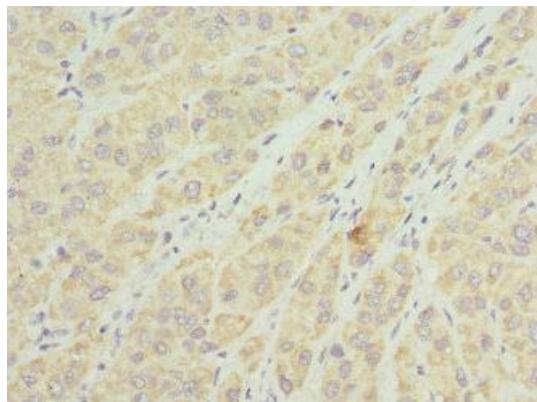

Immunogen:

Recombinant Human Mitochondrial import inner membrane translocase subunit Tim8 A protein (1-97AA).

Storage:

PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Product Images

Immunohistochemistry of paraffin-embedded human liver cancer using PACO44417 at dilution of 1:100.
