Product Information

Size: **Protein Background:**

50ug Calcium-activated, phospholipid- and diacylglycerol (DAG)-dependent

serine/threonine-protein kinase that plays diverse roles in neuronal cells and eye Reactivity:

tissues, such as regulation of the neuronal receptors GRIA4/GLUR4 and

GRIN1/NMDAR1, modulation of receptors and neuronal functions related to sensitivity Human

> to opiates, pain and alcohol, mediation of synaptic function and cell survival after ischemia, and inhibition of gap junction activity after oxidative stress. Binds and

phosphorylates GRIA4/GLUR4 glutamate receptor and regulates its function by

increasing plasma membrane-associated GRIA4 expression.
