PPP1CB Antibody, HRP conjugated

PACO51839

Product Information	
Size:	Protein Background:
50ug	Protein phosphatase that associates with over 200 regulatory proteins to form highly
Reactivity:	specific holoenzymes which dephosphorylate hundreds of biological targets. Protein phosphatase (PP1) is essential for cell division, it participates in the regulation of
Human	glycogen metabolism, muscle contractility and protein synthesis. Involved in regulation of ionic conductances and long-term synaptic plasticity. Component of the PTW/PP1
Source:	phosphatase complex, which plays a role in the control of chromatin structure and cell
Rabbit	cycle progression during the transition from mitosis into interphase. In balance with CSNK1D and CSNK1E, determines the circadian period length, through the regulation
lsotype:	of the speed and rhythmicity of PER1 and PER2 phosphorylation. May dephosphorylate CSNK1D and CSNK1E. Dephosphorylates the 'Ser-418' residue of FOXP3 in regulatory
lgG	T-cells (Treg) from patients with rheumatoid arthritis, thereby inactivating FOXP3 and
Applications:	rendering Treg cells functionally defective.
ELISA	Gene ID:
Recommended dilutions:	PPP1CB
	Uniprot
	P62140
	Synonyms:
	Serine/threonine-protein phosphatase PP1-beta catalytic subunit (PP-1B) (PPP1CD) (EC 3.1.3.16) (EC 3.1.3.53), PPP1CB
	Immunogen:
	Recombinant Human Serine/threonine-protein phosphatase PP1-β catalytic subunit protein (175-221AA).
	Storage:

Preservative: 0.03% Proclin 300. Constituents: 50% Glycerol, 0.01M PBS, pH 7.4
