

# Recombinant Protein Technical Manual Recombinant Human TIM1/HACVR1 Protein (His Tag) RPES4103

### **Product Data:**

**Product SKU:** RPES4103 **Size:** 50μg

Species: Human Expression host: HEK293 Cells

**Uniprot:** AAC39862.1

## **Protein Information:**

Molecular Mass: 31.3 kDa

AP Molecular Mass: 8000 kDa

Tag: N-His

**Bio-activity:** 

**Purity:** > 93 % as determined by reducing SDS-PAGE.

**Endotoxin:**  $< 1.0 \text{ EU per } \mu\text{g}$  as determined by the LAL method.

**Storage:** Lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C.

Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

**Shipping:** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation:** Lyophilized from sterile PBS, pH 7.4

**Reconstitution:** Please refer to the printed manual for detailed information.

Application:

**Synonyms:** CD365;HACVR;HAVCR;KIM;KIM1;TIM;TIM;TIM1;TIMD;TIMD1

# Immunogen Information:

Sequence: Ser 21-Gly 290

# Background:

HAV cellular receptor 1 (HAVCR1), also known as Kidney injury molecule 1 (KIM) and T cell immunoglobulinmucin 1 (TIM), is a type â... integral membrane glycoprotein. KIM protein is widely expressed with highest levels in kidney and testis. It has been shown to play a major role as a human susceptibility gene for asthma, allergy and autoimmunity. IgA1lambda is a specific ligand of KIM protein and that their association has a synergistic effect in virus-receptor interactions. KIM involves in the pathogenesis of acute kidney injury. It had been confirmed that KIM is a human urinary renal dysfunction biomarker. Moreover, KIM protein is a novel regulatory molecule of flow-induced calcium signaling.
