

HDFP1064

Product Information

Product SKU:	HDFP1064	Expression Host:	HEK293	Size:	10µg
Target:	LSHR	Tag:	C-Flag&Strep Tag		

Additional Information

Conjugate:	Unconjugated	Uniprot ID:	P22888
Molecular Weight:	The human full length LSHR-Strep protein has a MW of 78.6 kDa		

Protein Information

Background: This gene encodes the receptor for both luteinizing hormone and choriogonadotropin. This receptor belongs to the G-protein coupled receptor 1 family, and its activity is mediated by G proteins which activate adenylate cyclase. Mutations in this gene result in disorders of male secondary sexual character development, including familial male precocious puberty, also known as testotoxicosis, hypogonadotropic hypogonadism, Leydig cell adenoma with precocious puberty, and male pseudohermaphroditism with Leydig cell hypoplasia. [provided by RefSeq, Jul 2008]

Synonyms: HHG, LCGR, LGR2, LH/CG-R, LH/CGR, LHR, LHRHR, LSH-R, ULG5

Protein Description: Human LSHR-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Protein Pathways: GPCRDB Class A Rhodopsin-like, Ovarian Infertility Genes, Peptide GPCRs, Cancer, G-Protein Coupled Receptors Signaling Pathway.

Protein Families: Transmembrane, Druggable Genome.

Usage: Research use only

Contact Details | Dublin, Ireland
