Nanodisc Human P2Y14-Strep Protein

HDFP1162

Product Information

Product SKU: HDFP1162 Expression Host: HEK293 Size: 10μg

Target: P2Y14 **Tag**: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated Uniprot ID: Q15391

Molecular Weight: The human full length P2Y14-Strep protein has a MW of 39 kDa

Protein Information

Background: The product of this gene belongs to the family of G-protein coupled receptors, which

contains several receptor subtypes with different pharmacological selectivity for

various adenosine and uridine nucleotides. This receptor is a P2Y purinergic receptor

for UDP-glucose and other UDP-sugars coupled to G-proteins. It has been implicated

in extending the known immune system functions of P2Y receptors by participating

in the regulation of the stem cell compartment, and it may also play a role in

neuroimmune function. Two transcript variants encoding the same protein have been

identified for this gene. [provided by RefSeq, Jul 2008]

Synonyms: BPR105, GPR105, P2Y14

Protein Description: Human P2Y14-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: GPCRDB Class A Rhodopsin-like.

Protein Families: GPCR, Transmembrane, Druggable Genome.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
