Nanodisc Human TA2R9-Strep Protein

HDFP1203

Product Information

Product SKU: HDFP1203 Expression Host: HEK293 Size: 10μg

Target: TA2R9 **Tag**: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated Uniprot ID: Q9NYW1

Molecular Weight: The human full length TA2R9-Strep protein has a MW of 35.6 kDa

Protein Information

Background: This gene product belongs to the family of candidate taste receptors that are

members of the G-protein-coupled receptor superfamily. These proteins are

specifically expressed in the taste receptor cells of the tongue and palate epithelia.

They are organized in the genome in clusters and are genetically linked to loci that

influence bitter perception in mice and humans. In functional expression studies, they

respond to bitter tastants. This gene maps to the taste receptor gene cluster on

chromosome 12p13. [provided by RefSeq, Jul 2008]

Synonyms: T2R9, TRB6

Protein Description: Human TA2R9-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Transmembrane, Druggable Genome.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
