Nanodisc Human ABCG1-Strep Protein

HDFP1220

Product Information

Product SKU: HDFP1220 Expression Host: HEK293 Size: 10μg

Target: ABCG1 **Tag**: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: P45844

Molecular Weight: The human full length ABCG1-Strep protein has a MW of 75.6 kDa

Protein Information

Background: The protein is a member of the superfamily of ATP-binding cassette (ABC)

transporters. ABC proteins transport various molecules across extra- and intra-cellular

membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP,

MRP, ALD, OABP, GCN20, White). This protein is a member of the White subfamily. It

is involved in macrophage cholesterol and phospholipids transport, and may regulate

cellular lipid homeostasis in other cell types

Synonyms: ABC8; WHITE1

Protein Description: Human ABCG1-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: ABC transporters.

Protein Families: Druggable Genome, Transmembrane.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
