Nanodisc Human VDAC3-Strep Protein

HDFP1272

Product Information

Product SKU: HDFP1272 Expression Host: HEK293 Size: 10μg

Target: VDAC3 **Tag**: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: Q9Y277

Molecular Weight: The human full length VDAC3-Strep protein has a MW of 30.7 kDa

Protein Information

Background: This gene encodes a voltage-dependent anion channel (VDAC), and belongs to the

mitochondrial porin family. VDACs are small, integral membrane proteins that

traverse the outer mitochondrial membrane and conduct ATP and other small

metabolites. They are known to bind several kinases of intermediary metabolism,

thought to be involved in translocation of adenine nucleotides, and are hypothesized

to form part of the mitochondrial permeability transition pore, which results in the

release of cytochrome c at the onset of apoptotic cell death. Alternatively transcript

variants encoding different isoforms have been described for this gene. [provided by

RefSeq, Oct 2011]

Synonyms: HD-VDAC3, VDAC-3

Protein Description: Human VDAC3-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Ion Channels: Other.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
