Nanodisc Human CCG4-Strep Protein

HDFP1296

Product Information

Product SKU: HDFP1296 Expression Host: HEK293 Size: 10μg

Target: CCG4 **Tag**: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: Q9UBN1

Molecular Weight: The human full length CCG4-Strep protein has a MW of 36.6 kDa

Protein Information

Background: The protein encoded by this gene is a type I transmembrane AMPA receptor

regulatory protein (TARP). TARPs regulate both trafficking and channel gating of the

AMPA receptors. This gene is part of a functionally diverse eight-member protein

subfamily of the PMP-22/EMP/MP20 family and is located in a cluster with two family

members, a type II TARP and a calcium channel gamma subunit. [provided by RefSeq,

Dec 2010]

Synonyms: -

Protein Description: Human CCG4-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Ion Channels: Other.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
