## **Nanodisc Human AGRL3 Protein**

## HDFP200

## **Product Information**

Product SKU:	HDFP200	Expression Host:	HEK293	Size:	10µg	
Target:	AGRL3	Tag:	C-Flag Tag			
Additional Infor	mation					
<b>Conjugate</b> :	Unconjugat	ed Unip	orot ID:	Q9HAR2		
Molecular Wei	<b>ght:</b> The human	The human full length AGRL3 protein has a MW of 161.8kDa				
Protein Informa	tion					
Background:	receptor	s (GPCR). Latrophilir	ns may fun	trophilin subfamily o ction in both cell a human species, ende	dhesion and signal	

Background:	This gene encodes a member of the latrophilin subfamily of G-protein coupled		
	receptors (GPCR). Latrophilins may function in both cell adhesion and signal		
	transduction. In experiments with non-human species, endogenous proteolytic		
	cleavage within a cysteine-rich GPS (G-protein-coupled-receptor proteolysis site)		
	domain resulted in two subunits (a large extracellular N-terminal cell adhesion		
	subunit and a subunit with substantial similarity to the secretin/calcitonin family of		
	GPCRs) being non-covalently bound at the cell membrane. [provided by RefSeq, Jul		
	2008]		
Synonyms:	CIRL3, CL3, LEC3, LPHN3		
Protein Description:	Human AGRL3 full length protein-synthetic nanodisc		
Formulation:	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH		
	8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please		
	see Certificate of Analysis for specific instructions. Do not use solvents with a pH		
	below 6.5 or those containing high concentrations of divalent metal ions (greater		
	than 5 mM) in subsequent experiments.		
Protein Pathways:	GPCRDB Class B Secretin-like, GPCRDB Other.		
Protein Families:	GPCR, Transmembrane, Druggable Genome.		
Usage:	Research use only		

**Storage & Shipping**: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
