Nanodisc Human LPAR2 Protein

HDFP326

Product Information

Product SKU: HDFP326 Expression Host: HEK293 Size: 10μg

Target: LPAR2 **Tag**: C-Flag Tag

Additional Information

Conjugate: Unconjugated Uniprot ID: Q9HBW0

Molecular Weight: The human full length LPAR2 protein has a MW of 38.7kDa

Protein Information

Background: This gene encodes a member of family I of the G protein-coupled receptors, as well

as the EDG family of proteins. This protein functions as a lysophosphatidic acid (LPA)

receptor and contributes to Ca2+ mobilization, a critical cellular response to LPA in

cells, through association with Gi and Gq proteins. An alternative splice variant has

been described but its full length sequence has not been determined. [provided by

RefSeq, Jul 2008]

Synonyms: EDG-4, EDG4, LPA-2, LPA2

Protein Description: Human LPAR2 full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: Cancer, G-Protein Coupled Receptors Signaling Pathway.

Protein Families: GPCR, Transmembrane, Druggable Genome.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
