Nanodisc Human SSR1 Protein

HDFP457

Product Information

Product SKU: HDFP457 Expression Host: HEK293 Size: 10μg

Target: SSR1 Tag: C-Flag Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: P30872

Molecular Weight: The human full length SSR1 protein has a MW of 42.7kDa

Protein Information

Background: Somatostatins are peptide hormones that regulate diverse cellular functions such as

neurotransmission, cell proliferation, and endocrine signaling as well as inhibiting the

release of many hormones and other secretory proteins. Somatostatin has two active

forms of 14 and 28 amino acids. The biological effects of somatostatins are mediated

by a family of G-protein coupled somatostatin receptors that are expressed in a

tissue-specific manner. The protein encoded by this gene is a member of the

superfamily of somatostatin receptors having seven transmembrane segments.

Somatostatin receptors form homodimers and heterodimers with other members of

the superfamily as well as with other G-protein coupled receptors and receptor

tyrosine kinases. This somatostatin receptor has greater affinity for somatostatin-14

than -28. [provided by RefSeq, Jul 2012]

Synonyms: SRIF-2, SS-1-R, SS1-R, SS1R

Protein Description: Human SSR1 full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: GPCRDB Class A Rhodopsin-like, Peptide GPCRs, Cancer.

Protein Families: GPCR, Transmembrane, Druggable Genome.

Usage: Research use only

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing

and thawing). Lyophilized proteins are shipped at ambient temperature.
