Nanodisc Human 5HT3D Protein

HDFP690

Product Information

Product SKU: HDFP690 Expression Host: HEK293 Size: 10μg

Target: 5HT3D **Tag**: C-Flag Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: Q70Z44

Molecular Weight: The human full length 5HT3D protein has a MW of 50.2kDa

Protein Information

Background: The protein encoded this gene belongs to the ligand-gated ion channel receptor

superfamily. This gene encodes subunit D of the type 3 receptor for 5-

hydroxytryptamine (serotonin), a biogenic hormone that functions as a

neurotransmitter, a mitogen and a hormone. This hormone has been linked to

neuropsychiatric disorders, including anxiety, depression, and migraine. Serotonin

receptors causes fast and depolarizing responses in neurons following activation. The

genes encoding subunits C, D and E of this type 3 receptor form a cluster on

chromosome 3. Alternatively spliced transcript variants encoding different isoforms

have been found for this gene. [provided by RefSeq, Jul 2009]

Synonyms: 5HT3D

Protein Description: Human 5HT3D full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Ion Channels: Cys-loop Receptors.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
