Nanodisc Human ACHA4 Protein

HDFP695

Product Information

Product SKU:	HDFP695	Expression	Host: HEK293	Size:	10µg		
Target:	ACHA4	Tag:	C-Flag Tag				
Additional Information							
Conjugate :	Unconju	igated	Uniprot ID: P	43681			
Molecular Wei	ght: The hun	The human full length ACHA4 protein has a MW of 70kDa					

Protein Information

Background:	This gene encodes a nicotinic acetylcholine receptor, which belongs to a superfamily		
	of ligand-gated ion channels that play a role in fast signal transmission at synapses.		
	These pentameric receptors can bind acetylcholine, which causes an extensive		
	change in conformation that leads to the opening of an ion-conducting channel		
	across the plasma membrane. This protein is an integral membrane receptor subunit		
	that can interact with either nAChR beta-2 or nAChR beta-4 to form a functional		
	receptor. Mutations in this gene cause nocturnal frontal lobe epilepsy type 1.		
	Polymorphisms in this gene that provide protection against nicotine addiction have		
	been described. Alternative splicing results in multiple transcript variants. [provided		
	by RefSeq, Feb 2012]		
Synonyms:	BFNC, EBN, EBN1, NACHR, NACHRA4, NACRA4		
Protein Description:	Human ACHA4 full length protein-synthetic nanodisc		
Formulation :	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH		
	8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please		
	see Certificate of Analysis for specific instructions. Do not use solvents with a pH		
	below 6.5 or those containing high concentrations of divalent metal ions (greater		
	than 5 mM) in subsequent experiments.		
Protein Pathways:	-		
Protein Families:	Ion Channels: Cys-loop Receptors.		

Usage:	Research use only	
Storage & Shipping:	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not	
	intended for use within a month, aliquot and store at -80°C (Avoid repeated freezi	
	and thawing). Lyophilized proteins are shipped at ambient temperature.
