# Nanodisc Human P2RX4 Protein

## HDFP734

## **Product Information**

Product SKU: HDFP734 Expression Host: HEK293 Size: 10μg

**Target**: P2RX4 **Tag**: C-Flag Tag

### **Additional Information**

**Conjugate**: Unconjugated **Uniprot ID**: Q99571

Molecular Weight: The human full length P2RX4 protein has a MW of 43.4kDa

### **Protein Information**

**Background**: The product of this gene belongs to the family of purinoceptors for ATP. This receptor

functions as a ligand-gated ion channel with high calcium permeability. The main

pharmacological distinction between the members of the purinoceptor family is the

relative sensitivity to the antagonists suramin and PPADS. The product of this gene

has the lowest sensitivity for these antagonists. Multiple alternatively spliced

transcript variants, some protein-coding and some not protein-coding, have been

found for this gene. [provided by RefSeq, Feb 2012]

**Synonyms**: P2X4, P2X4R

**Protein Description**: Human P2RX4 full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

**Protein Families:** Ion Channels: ATP Receptors.

**Usage**: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
